## EDUCATION

---

### Neapolis University Pafos

*BSc in Applied Computer Science*

Paphos, Cyprus

Oct. 2022 – Feb. 2025

Awarded JetBrains-sponsored education for math and programming undergraduates

Relevant courses: Computer Vision, Robotics, Machine Learning, Deep Learning, Image Processing, Computer Graphics, Distributed systems, Computer Networks, Game Design & Development

### Higher School of Economics

*BSc in Applied Mathematics and Informatics*

Moscow, Russia

Aug. 2020 – May 2024

Relevant courses: Bayesian Methods for ML, Machine Learning, Deep Learning, Reinforcement Learning, Statistical Learning Theory, Deep Learning for Graph Data Analysis, Generative Models in DL, One-Way Functions, Combinatorial Constructions, Theory of Computation, Convex Optimization and Approximation algorithms

### Higher School of Economics

*BSc in Mathematics, incomplete*

Moscow, Russia

Aug. 2019 – May 2020

## EXPERIENCE

---

### JetBrains (JB Academy) – Internship | *Python*

Aug. 2024 – Present

- Thesis project with NHGRI - Hi-C phasing for polyploids
- Creation Graph Representative Learning course for NUP

### JetBrains (IntelliJ IDEA) – Summer internship | *Kotlin*

Aug. 2024 – Oct. 2024

- Developed a tool to automate accessibility audits of IntelliJ-based IDEs, ensuring improved usability for users with disabilities.
- Integrated audit features into an existing UI inspection tool for Java Swing, analyzing accessibility metadata for potential issues

### Higher School of Economics and Neapolis University Pafos – Teacher assistant

Sept. 2022 – Present

- Assisted in teaching and curriculum development for calculus (first and second years), discrete math, machine learning, and deep learning courses
- Provided instructional support to students, conducted review sessions, and offered guidance on assignments and projects. Contributed to grading assignments, exams, and projects.

### Automatica Service – Intern | *Python*

July 2021 – Sept. 2021

- Refactoring code of ML algorithms using Python
- Implementation of asynchrony

## PROJECTS

---

### Manga colorization with diffusion models and benchmarking methods

Nov. 2023 – May 2024

- Implementation conditional diffusion model for colorization
- Creation benchmarking methods for colorization task

### Q&A Bot

May 2023 – Aug. 2023

- Developed Telegram bot using AIOGram, answering queries from chat history, represented as vector space
- Researched Russian-speaking QA models for enhanced natural language processing
- **Technical Skills:** aiogram, LangChain, HuggingFace, Git, FAISS

### Prediction of phlebological diseases using PINN and bifurcation analysis

Sept. 2022 – May 2023

- Deep learning research coursework
- Implementation of neural network based on PINN and BiNN, augmentation of MRI and CT images using GAN
- **Technical Skills:** TensorFlow, HuggingFace, HSE HPC "cCHARISMa"

## TECHNICAL SKILLS

---

**Programming languages:** Python, C, C++, Kotlin, SQL, bash

**Developer Tools:** Git, Docker, Jupyter Notebook

**Frameworks & Libraries:** Scikit Learn, Pandas, Numpy, Seaborn, Matplotlib, Pytorch, Tensorflow, Theano

## LANGUAGES

---

**Russian:** Native

**English:** Intermediate B2

**German:** Pre Intermediate A2

## ACHIEVEMENTS

---

Winner of Math Competition of SPbU (2019), Prizewinner of several all-Russian Math Competitions

## OTHER

---

Currently working as a private Maths tutor, various volunteering experience. [Some online courses certificates](#)
